Education

Stevens Institute of Technology

Bachelor of Science in Computer Science (GPA: 3.30 / 4.00)

Expected December 2025

Hoboken, NJ

Technical Skills

Languages: Python, Java/Kotlin, JavaScript, SQL, C/C++/C#, R, OCaml

Technologies: React.js, Vue.js, Flask, Spring Boot, Gradle, Express.js, TensorFlow, PyTorch, PostgreSQL, Node.js, Pandas

Concepts: Data Structures, Algorithms, Agile Methods, Artificial Intelligence, Programming Languages, Software Development, Systems Design

Projects

SATD IntelliJ Plugin | Java, Kotlin, SQLite, GitHub API, IntelliJ Platform SDK, Gradle, LLM APIs (OpenAI/Gemini/Ollama)

- Led development of comprehensive system for detecting and managing Self-Admitted Technical Debt (SATD) within software repositories by leveraging parsed source code comments and commit history to identify developer-flagged technical debt
- Built a robust and intuitive user interface for **delivering AI-generated insights** into technical debt annotations with real-time interactions with multiple LLM APIs (**OpenAI, Gemini, and Ollama**), enabling users to request explanations, classifications, and suggested refactors for SATD comments directly in the IDE.

Ali2025 Voter Registration Tool | React, Node.js, Express, PostgreSQL, Nginx

- Designed and deployed a **full-stack** voter registration platform to increase civic engagement and streamline local voter outreach, especially among underserved communities.
- Architected the system using **React** for the frontend and RESTful **Node.js/Express** API integrating with **PostgreSQL** for secure and structured data storage of voter information

Experience

Stevens Institute of Artificial Intelligence

November 2024 – May 2025

Research Assistant

Hoboken, NJ

- Received Provost's Undergraduate Research Award
- Developed a deep learning pipeline using **Convolutional Neural Networks (CNNs)** in **TensorFlow/Keras** and **PyTorch** to detect and classify macromolecular changes in high-resolution .tiff fluorescence microscopy images.
- Employed **NumPy** and **OpenCV** for preprocessing, including pixel normalization and noise reduction in blinking particle signals to achieve 97% accuracy

Ali for Jersey City 2025

January 2025 – Present

Lead Software Engineer

Jersey City, NJ

- Led the design and development of a voter registration confirmation platform by managing a cross-functional team spanning civil service, legal compliance, and software engineering disciplines
- Oversaw Agile-based project delivery using **scrum sprints**, daily stand-ups, and **iterative feedback** to ensure timely milestones and continuous improvement.

Leadership and Involvement

Stevens Society of Artificial Intelligence

November 2024 – Present

Founder and President

Hoboken, NJ

- Founded the first ever student-led AI initiative at Stevens to empower over 70 undergraduates in AI and Machine Learning education

National Student Data Corps

January 2025 – Present

Founder and Chair

Hoboken, NJ

- Established the Stevens Institute of Technology chapter of the National Student Data Corps to promote data literacy, equity, and community engagement through workshops, mentorship, and collaborative projects. Led outreach efforts to connect students with real-world data science applications in social impact, public policy, and research.
